Practice13: Seaborn

Question01

Please read the data from the CSV file (healthcare-dataset-stroke-data.csv)

- **First, explore the dataset and understand the columns.**

- **Clean the dataset:**
  - Handle missing values (drop or fill them).
  - Change or create columns if needed to make visualization easier.

- **After cleaning, analyze the data using Seaborn charts taught in class.**
  - Try different plots and see which ones work well for this dataset.

- **For each plot, briefly explain what you learned from it.**

Good luck

Never give up, never stop learning
